

Pakistan's Energy Transition

About SDPI

SDPI was founded in August 1992 on the recommendation of the Pakistan National Conservation Strategy (NCS), also called Pakistan's Agenda 21. The NCS placed Pakistan's socio-economic development within the context of a national environmental plan. This highly acclaimed document, approved by the Federal Cabinet in March 1992, outlined the need for an independent non-profit organization to serve as a source of expertise for policy analysis and development, policy intervention, and policy and program advisory services. SDPI is registered under the Societies Registration Act, XXI of 1860.

Mission

To catalyse the transition towards sustainable development, defined as the enhancement of peace, social justice and well-being, within and across generations.

Vision

To be a center of excellence on sustainable development policy research, capacity development and advocacy in Pakistan.

About Newsletter

To keep abreast of emerging issues at the national/international and local level, the SDPI brings out a Bi-Monthly E-Newsletter on
“Pakistan's Energy Transition”

It carries reference information's to the news items/comments/Op-Eds appearing in leading National/International daily newspapers.

Newspapers Covered:

• Dawn	• The News	• The Express Tribune
• The Nation	• Business Recorder	• Daily Times
• Pakistan Observer	• Pakistan Today	• Urdu Point
• China Daily		

Editor Note:

Clean energy transition is the only answer and solution to secure the sustainable future of Pakistan. There is a dire need to address the use of clean energy timely as it is not only the safest, reliable, and efficient means of energy production but will also harness the abundant indigenous energy resource available in Pakistan. Pakistan's recent policies and initiatives have strongly advocated the need for Pakistan to transition towards clean energy resources. With ARE policy aiming to achieve 30% power through hydro and 30% share of renewables in the energy mix, Electric Vehicles (EVs) policy targeting to achieve 30% share of EVs by 2030, Paris Agreement goals, and the recent moratorium of coal by Prime Minister in Climate Summit, Pakistan is taking a leap towards a green energy future.

However, the development of clean energy transition in Pakistan cannot be achieved without political leadership and need of research-based scientific evidence to help transform the conventional policy making process in Pakistan.

In this regard, Sustainable Development Policy Institute (SDPI) runs a "Clean Energy Transition Program", under which "Network for Clean Energy Transition in Pakistan: Research and Advocacy", along with the "Renewable Energy Parliamentary Caucus" have been launched and established to mobilise policies into implementation with clear goals and targets. Our work is focused on (but not limited to) building momentum by exploring the missing gaps and links for achieving Sustainable Development Goal 7 (SDG7) through a holistic approach, especially to explore ways for post-COVID green economic recovery; aligning the wider sustainability agenda with SDG7, sectoral policy reforms, renewable energy investment streams, green financing, private sector engagements, and other windows of opportunities for achieving the goal of clean energy transition in Pakistan.

Subjects Covered

- Energy and power
- Renewable energy
- Sustainability
- Energy investment, innovation, automation
- Oil and gas sector
- Transport
- Industry
- CEPC Energy projects
- Energy finance and economics

Global conference in Islamabad to breathe new life into climate actionSource: [Zaki Abbas](#), [Dawn, Islamabad](#), 2025-02-05

ISLAMABAD: As Pakistan faces increasing vulnerability due to climate change, almost 100 experts from across the world will converge on Islamabad for a two-day climate conference from tomorrow (Thursday) to raise awareness, stimulate action, and lay the foundation for a climate-resilient society. The international conference to be held at the Jinnah Convention Centre on Feb 6-7 is part of D..... [more >>](#)

How Imran is losing a remittance war against govt: reportSource: [News Desk](#), [The News, International](#), 2025-02-13

ISLAMABAD: In December last year, former Pakistan Prime Minister Imran Khan issued an unlikely threat to the country's government: After spending more than 15 months behind bars on what he called "politically motivated charges" and following multiple failed protests, he warned that he would launch a civil disobedience movement, Aljazeera reported. "As part of the movemen..... [more >>](#)

Experts stress need for stronger green finance policies for energy transitionSource: [Our Correspondent](#), [The News, International](#), 2025-02-13

KARACHI: Amid pressing climate change challenges and growing concerns over energy sustainability, the Indus Consortium hosted an event titled 'Banking on Renewables' on Wednesday in Karachi. The gathering brought together key stakeholders, including banking professionals, civil society organisations (CSOs), environmental experts, and community representatives, to discuss sustainable f..... PTI's call for remittance boycott fails as overseas Pakistanis prioritize family over politicsSource: [Monitoring Desk](#), [Profit](#), 2025-02-15

Despite former Prime Minister Imran Khan's call for overseas Pakistanis to limit remittances as a form of civil disobedience, Pakistan's remittance inflows have surged, indicating that economic necessities outweigh political allegiance for most expatriates. In December 2024, while incarcerated, Khan urged overseas Pakistanis to boycott remittances to pressure the government, arguing..... [more >>](#)
