

**ESTIMATING SIZE & OPERATIONS OF PUBLIC
SECTOR AND ITS IMPACT ON WHEAT MARKET
IN PAKISTAN: A POST-18TH
CONSTITUTIONAL AMENDMENT INQUIRY**

Stakeholder Analysis

Farmers, Middlemen, Millers, Trade Unions, Consumers, Media and the Government Officials.

SWOC Analysis

SWOC stands for:

- **Strengths** – Qualified researchers that are supportive in conducting key informative interviews, focussed group discussion (FGD), and quantification of welfare loss.
- **Weaknesses** – Somehow, it depends on the latest SAM that would be provided by Paul Dorosh.
- **Opportunities** – This would be the first post 18th amendment analysis of wheat market in Pakistan.
-The use of micro-simulation model would provide better policy analysis.
- **Challenges** – Availability of the potential stakeholders in FGDs, Key Informant Interviews.

The Logical Framework Matrix

<u>Objectives & activities</u>	<u>Indicators</u>	<u>Means of verification</u>	<u>Assumptions</u>
Goal (Impact)	Issues of wheat farmers and other stakeholders can be addressed	Consistency in Simulations	The parameters would remain consistent over time
Purpose/ (Outcome)	Policy Recommendation for post 18 th amendment analysis	Consistency in Simulations	The CGE model approximates the economy accurately
Outputs	Formation of a CGE Model, Quantifying the welfare loss	Consistency in Simulations	Availability of Data
Activities	Means	Cost
