#### The three Cs
Soon after my second Covid-19 shot, I received an email from a dear friend who I had been remiss in contacting, asking how I was coping with, as she put it, ‘the three Cs’ – the Covid-19 pandemic, the coup attempt at the Capitol, and the climate crisis. Donald Trump, and Donald Trump alone, was responsible for most of the calamity inflicted on us by these three Cs here in.....

#### New surge
The latest surge in the Covid-19 virus could take the country's total of 630,000 cases and over 13,800 deaths far higher. To add to the problems, the new variant of the virus is both more fatal and spreads more quickly than the previous variant of the coronavirus. The threat then is far greater. A meeting of the NCOC held on Monday morning has decided that SOPs already imposed in the country n.....

#### Resurgent virus and vaccine worries
Source: Editorial, *The Express Tribune, Islamabad*, 2021-03-23
The third wave of Covid-19 infections has seen records broken for daily infections, with positivity rates hitting as high as nine per cent. The prime minister’s household has also been hit, with Imran Khan and Bushra Bibi both testing positive. The NCOC has thus ordered immediate restrictions on activities contributing to the surge in the infection. Under the decisions taken yesterday, no co.....

#### Vaccine on holiday?
Source: EDITORIAL, *Dawn, Islamabad*, 2021-03-23
AS the third Covid-19 wave rages in the country, the management of the vaccination programme leaves a lot to be desired. With infection rates rising, school closures and new restrictions, the authorities must put all their resources into making the vaccine roll-out successful. Unfortunately, at present, certain decisions regarding the inoculation drive betray a non-serious approach. For example, t.....

#### Vaccination for a few
Source: Arifa Noor, *Dawn, Islamabad*, 2021-03-23
THE day the coronavirus vaccination campaign began, a friend called as he waited at one of the inoculation centres in Islamabad. It was a mess, he said. Too many people had been called in and the hospital administration was unprepared. There was no system in place and neither was there any seating arrangement for those who waited, who consisted mostly of the elderly and frail. And it was overcrowd.....

#### Patriarchal pandemic
Shortly after the onset of the pandemic here in Mexico last year, femicides and calls to domestic violence hotlines soared. Mexican President Andrés Manuel López Obrador (AMLO) – who had previously expressed annoyance that the femicide issue should distract from a very important project to raffle the presidential plane – then took it upon himself to claim that 90 percent .....

Covid-19 vaccines: Thinking fast and slow
Source: BR Research, Business Recorder, Islamabad, 2021-03-25
The 7-day average for covid-19 new cases is trailing 3,500. Yesterday’s fresh cases stood at 3,300. In mid-February, the 7-day average was around 1,100. In fact, the second-wave’s peak happened during the first 10 days of December where the highest 7-day average stood at 3,200, lower than the current average of covid-19 weekly cases. It looks like Covid-19 is here to stay. Arguabl.....
